

i made a template for us (edited)

simplyME 11/04/2023 2:31 PM

Ahh Kay, gotcha! 'll let you know when I have something to commit

xtoadette 11/04/2023 2:32 PM

i'm going to work on main a little bit more this afternoon

it looks like we need to implement fifo and luckily my lab works so it should be easy to transfer that over

1

simplyME 11/04/2023 2:32 PM

Ahh nice

I should be ready by tomorrow

November 5, 2023

xtoadette 11/05/2023 10:03 AM

hey i started filling in the functions, im gonna need you to try to make sense of what's going on with it bc im lost 😂

simplyME 11/05/2023 10:48 AM

bruh 😂 ! give me a sec i'm currently working on the lab I should get to it soon

xtoadette 11/05/2023 10:50 AM

take your time lmao

November 6, 2023

xtoadette 11/06/2023 8:17 PM

hey i got main to work but main_pr is giving me seg faults

simplyME 11/07/2023 2:05 PM

Hey, im gonna do a git pull are things updated on your end

xtoadette 11/07/2023 2:05 PM

let me double check really quick

simplyME 11/07/2023 2:06 PM

I was working on another group project sorry

xtoadette 11/07/2023 2:08 PM

i just pushed it, go ahead and pull

simplyME 11/07/2023 2:19 PM

kay I just got it, I'm quickly heading to lunch I'll message you in a bit

xtoadette 11/07/2023 2:19 PM

sounds good

simplyME 11/07/2023 5:14 PM

I'm trying ot understand whats going on with main_pr.c

xtoadette 11/07/2023 6:05 PM

it's the same thing as regular main but with added page replacement using fifo
except it's not working

simplyME 11/07/2023 8:02 PM

okay so I got the hang of main. I'm heading to bed early, so if you finish anything tonight could you ju

November 8, 2023

simplyME 11/08/2023 10:50 AM
I keep getting the seg fault but I think I see the problem

xtoadette 11/08/2023 11:05 AM
what do you think it is? i still cant figure it out

simplyME 11/08/2023 11:57 AM
things keep going wrong on the 240th iteration of the loop
during that loop the code enters the second if statements
The addressing is a bit off
i'll keep looking through

xtoadette 11/08/2023 12:44 PM
interesting

simplyME 11/08/2023 12:51 PM
i'm working on it by trimming down the address text file right, and tracing the way the FIFO works on a white board
I shouldn't be too long

simplyME 11/08/2023 3:06 PM
okay!! Got it 'ish
So were no longer getting the segmentation faults but we are getting the wrong results
I'm not done going through everything so I may make so edits to the FIFO implementation in a bit. I'll push the version I have now

xtoadette 11/08/2023 4:54 PM
sounds good

1

i'll take another look

November 9, 2023

November 9, 2023

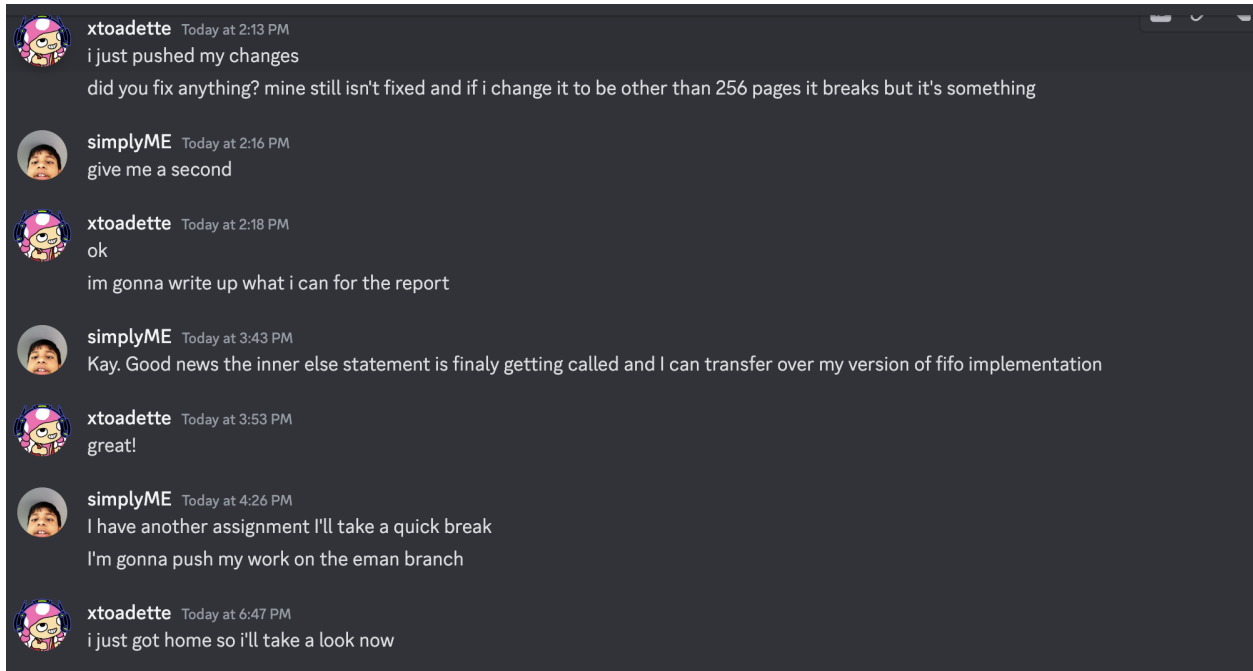

xtoadette Yesterday at 2:32 PM
still isn't working. i made changes and scrapped them all since the output was still the same

simplyME Yesterday at 4:31 PM
is the version you have pushed to git hub
I'm just about to start looking at it again

xtoadette Yesterday at 4:37 PM
i deleted my changes since they did absolutely nothing
one of my changes ended up with 1 page fault and 999 hits 😭

Not on Discord: 2 hours meeting on Nov 9th, 1 hour meeting on Nov 10th
